

Welcome

Somkolch Nigeria Ltd was established out of a desire of a group of diverse professionals inspired with a passion to stand out for excellent and innovative products. The company was incorporated in 2011 but commenced operations in August 2012. We started out with Wurth Purifiers but in March 2016, we rebranded the InjectorCure to SomKolch Nigeria Ltd in March 2016 and also created the smaller size 165 ml due to market demand.

We added Engine Flush to our product list in May 2016 due to our response to car service failures which was traced down to Engine oil viscosity/quality. In a lot instances, the quality of oil was okay but the problem occurred from the mixture of bad oil residue and gunk still existing in the oil chamber after the letting out of old oil.

Presently, we commenced packaging of the InjectorCure 165ml and 330ml in Nigeria in 2017, adding to our contribution to the quota of creating jobs for our youths.

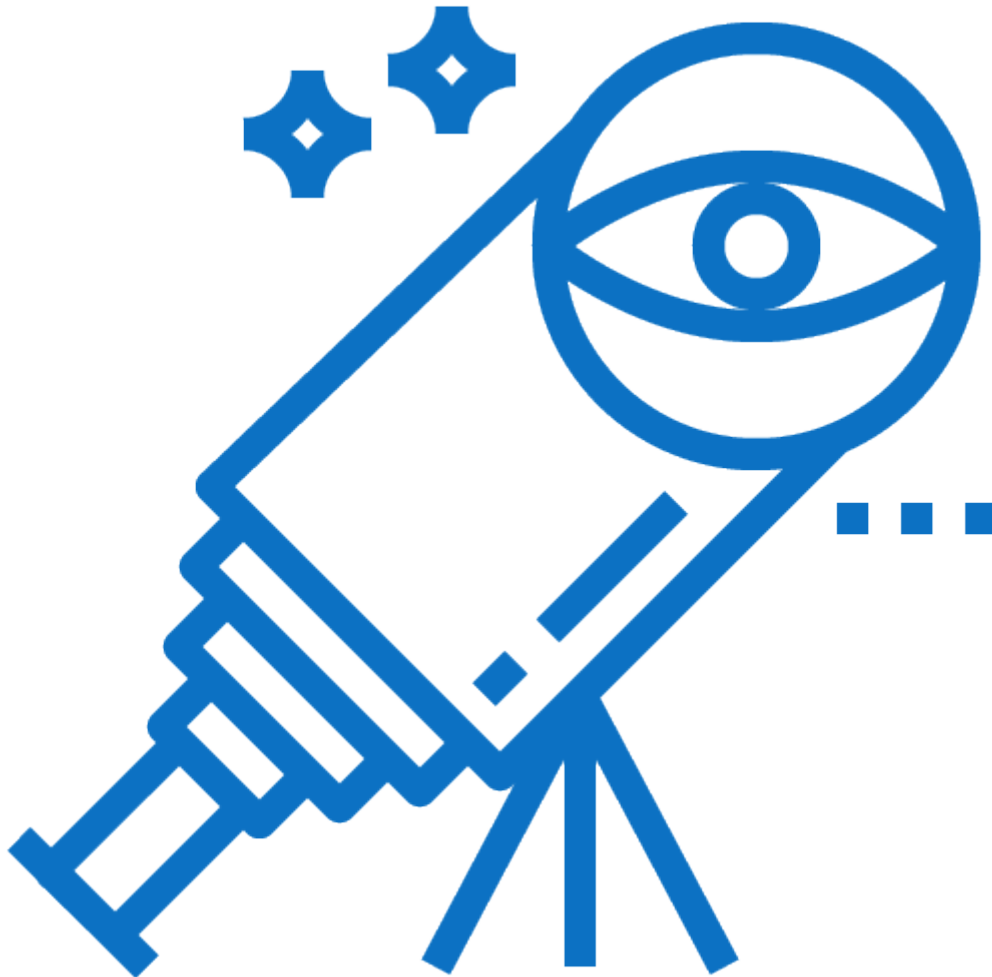

Today, we've added 10 more premium quality car, home and office maintenance products as described below.
